Tools: VS Code, Git-GitHub, IntelliJ IDEA

PROJECTS

Spotify clone With React.Js

- Developed a responsive music streaming app using React.js, closely mimicking Spotify's user interface and functionality.
- Implemented real-time audio playback and dynamic playlist management, showcasing proficiency in front-end development and state management.

Real Time Chat Application with Multiple Rooms (Github/Link)

- Created a real-time chat application using React.js and Socket.io, enabling seamless communication across multiple chat rooms.
- Implemented dynamic room creation and user interaction, demonstrating strong front-end and real-time data synchronization skills.

Desktop Application Using JAVA (Github/Link)

- Developed a feature-rich desktop application using Java, showcasing proficiency in object-oriented programming and user interface design.

INVOLVEMENT

Universal Human Values Workshop   Worked as Volunteer
2nd Feb - 8th Feb 2023   Dr. AITH, Kanpur

- I attended the Seven days evening workshop on **"Universal Human Values and Professional Ethics"** organized by Value Education Cell of Dr. AITH Kanpur.
- In which I gained a deep understanding of the significance of consistently valuing honesty, respect, and fairness in all professional interactions, thereby fostering a workplace culture characterized by positivity, trustworthiness, and collaboration.

ACHIEVEMENTS

- **HackerRank :** 5 * (star) in problem solving.
- **GFG :** Achieved 20th Rank under problem solving in my college.
- Solved 500+ DSA questions from GFG/HackerRank/Leetcode.
